Manufacturing Statistics in the Aerospace and Defense Industry

iBASEt surveyed AeroDef 2016 attendees to observe how far along manufacturing engineers within the Aerospace and Defense industry were with a fully automated manufacturing process. Review the results below.

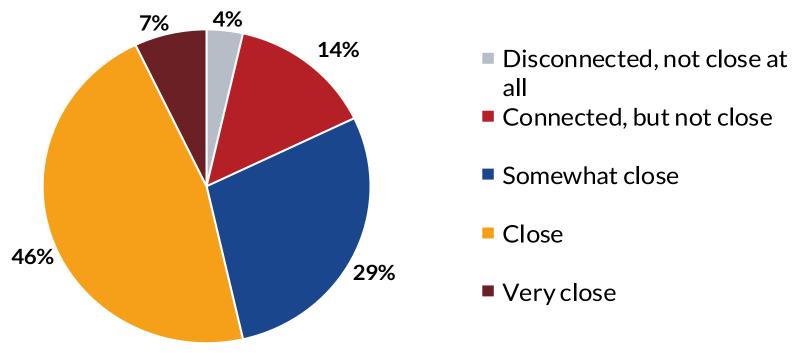

Is your ECN (Engineering Change Notice) integrated within your MES (Manufacturing Execution System)?

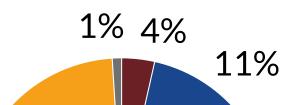

How would you grade your collaboration with design engineering and manufacturing? Do you expect your process planning to come from your engineering software?

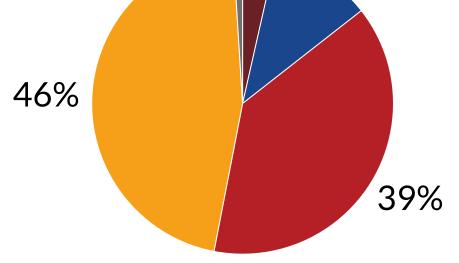

How close is your engineering and manufacturing **BOM (Bill of Materials)?**

How well does your quality and manufacturing integrate?

- Poorly integrated, need drastic improvements
- Somewhat, need some improvements
- Well, but could improve more
- Very well, no improvements needed
